

**Pressure gauges with Bourdon tube for  
Chemical industry with magnetic snap-action  
Contacts or inductive alarm contacts  
according to EN 837-1**

Diameter 100  
pressure position radial bottom  
or back eccentric,  
**with or without dampening**

Contact pressure gauges with electrical alarm contacts are suitable for controlling or regulating process sequences. The contacts open or close electrical circuits in relation to the position of the pointer on the pressure gauge.

The materials used make the gauges suitable for chemically aggressive gases or liquids, although these should not be too viscous or susceptible to crystallization.
